## EDUCATION

---

<b>Colby College</b> , Waterville, ME	<b>Bachelor of Arts, May 2016</b>
<i>Double Major: Computer Science/Mathematical Science</i>	<b>GPA: 3.33</b>
<b>Honors:</b> Class President, Hannibal Hamlin Award for Public Speaking	<b>Major GPA: 3.50</b>

## EXPERIENCE

---

<b>NorthEats, LLC</b> , Waterville, ME	<b>Winter 2015 - Present</b>
--	------------------------------

### *CEO*

- NorthEats is Maine's first mobile ordering system for food!
- Built iOS app that allows users to find, order, and pay for food from restaurants in the Mid-Maine area through their mobile phones.
- Built web app, which allows restaurants to view current orders, view order history, and update mobile menus.
- We will be accepting orders at three locations in Waterville, ME in early March 2016 and hope to expand from there!

<b>Colby Ice Cream</b> , Waterville, ME	<b>Fall 2015 - Present</b>
---	----------------------------

### *iOS Developer*

- Colby Ice Cream allows Colby College students to receive real-time updates on ice cream flavor offerings at Colby's three dining halls.
- Built iOS app that allows dining hall staff to submit flavors and students to check those flavors.
- Worked with Colby Dining Services to install 3 iPads (1 per dining hall) and trained staff to use them to post flavors.
- 300 downloads and counting! (You can read more about the app here: <http://bit.ly/1Sq4s8r>)

<b>Colby Hackers</b> , Waterville, ME	<b>Fall 2015 - Present</b>
---------------------------------------	----------------------------

### *President*

- Colby Hackers is a club on campus devoted to students interested in software development.
- Facilitate several lecture series in an effort to enhance student to student learning about tech and software development.
- Organize transportation and teams for several hackathons on the Major League Hackathon circuit.
- Assign software development project work around campus to club members; supervise these projects until completion.

**Capital One**, McLean, VA

### *Software Engineering Intern - Digital Product Engineering (DPE)*

**May 2015 - Present**

- Developed and packaged DASH agile reporting tool, to be deployed to open-source community at end of internship.
- Implemented security alerts in Capital One's Digital Wallet app with the Apple Pay integration team.
- Provisioned new cloud-based Development environments running on Amazon Web Services with CloudOps team.

**Microsoft**, Dublin, Ireland

### *Client Programming Project*

**Spring 2015**

- Worked closely with Microsoft's software engineers at the Microsoft Dublin campus to develop a web app for Microsoft's Office App Store.
- Participated in weekly code and design reviews with Microsoft's software engineers.
- Published app to Microsoft Office Store at culmination. Link below.

**Colby College**, Waterville, ME

### *Teaching Assistant – Colby Computer Science Department*

**February 2014 - Present**

- Aid computer science students with their assignments during weekly office hours.
- Serve as a general resource for students taking computer science courses, inside and outside of the computer lab.
