

DANIEL H. VOGEL

<http://dhvogel.github.io> dhvogel@colby.edu (781) 835-9318 8242 Mayflower Hill, Waterville, ME 04901

EDUCATION

| | |
|---|-----------------------------------|
| Colby College , Waterville, ME | Bachelor of Arts, May 2016 |
| <i>Double Major: Computer Science/Mathematical Science</i> | GPA: 3.33 |
| Honors: Class President, Hannibal Hamlin Award for Public Speaking | Major GPA: 3.50 |

EXPERIENCE

| | |
|--|------------------------------|
| NorthEats, LLC , Waterville, ME | Winter 2015 - Present |
|--|------------------------------|

Founder/CEO

- NorthEats is Maine's first mobile ordering system for food!
- Built Swift iOS app that allows users to find, order, and pay for food from restaurants with their mobile phones.
- Built static HTML/CSS/JS web app, which allows restaurants to view current orders, order history, and update menus.
- Check out our website at: <http://bit.ly/1oN2Vwm>

| | |
|---|----------------------------|
| Colby Ice Cream , Waterville, ME | Fall 2015 - Present |
|---|----------------------------|

iOS Developer

- Colby Ice Cream provides real-time updates on available ice cream flavors at Colby's dining halls.
- Built Swift iOS app that allows dining hall staff to submit flavors and students to check those flavors.
- Worked with Colby Dining Services to install 3 iPads (1 per dining hall) and trained staff to use them to post flavors.
- 500 downloads and counting! (Read about it here: <http://bit.ly/1Sq4s8r> and find it here: <http://apple.co/1Ux0Fpo>)

| | |
|---------------------------------------|----------------------------|
| Colby Hackers , Waterville, ME | Fall 2015 - Present |
|---------------------------------------|----------------------------|

President

- Colby Hackers is a club on campus devoted to students interested in software development.
- Facilitate several lecture series in an effort to enhance student to student learning about tech and software development.
- Organize transportation and teams for several hackathons on the Major League Hackathon circuit.
- Assign software development project work around campus to club members; supervise these projects until completion.

Capital One, McLean, VA

Software Engineering Intern - Digital Product Engineering (DPE)

Summer 2015

- Developed and packaged DASH agile reporting tool (a Java-based web application), to be deployed to open-source community at end of internship.
- Implemented security alerts in Capital One's Digital Wallet app with the Apple Pay integration team.
- Provisioned new cloud-based Development environments running on Amazon Web Services with CloudOps team.

Microsoft, Dublin, Ireland

Client Programming Project

Spring 2015

- Worked closely with Microsoft's software engineers at the Microsoft Dublin campus to develop a C#-based web app for Microsoft's Office App Store.
- Participated in weekly code and design reviews with Microsoft's software engineers.
- Published app to Microsoft Office Store at culmination. Can be found at: <http://bit.ly/1QpEuME>
